Work done by each of the families.

- Excavation for the foundation.
- Collaboration for furnishing the materials to the construction workers.
- Putting in the rocks in the floor.
- **Food for the Construction workers.** Each family invested an average of \$200 dollars to make the meals for the construction workers that working during the three weeks previous to the coming of the group of volunteers.

We should emphasize that the three families worked very hard during the three weeks previous to the arrival of the volunteers. These last photos were taken on the visits we made on June 6th and June 15th..

Thanks to everyone for letting us demonstrate to the world that Unity produces Strength. How tired we were after all these difficult days doesn't matter...No, we never gave up, and we saw with great satisfaction, and from the front row, the wonderful smiles on the faces of these three families.
